MESSAGE FROM THE ORGANIZING CHAIRMAN

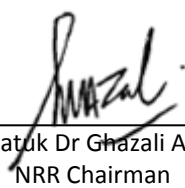

National Renal Registry (NRR) manages several important national databases related to dialysis and renal transplantation. The Malaysian Dialysis and Transplant Registry (MDTR) is in its 19th year of operation whilst its sister registry, The Malaysian Registry of Renal Biopsy (MRRB) is coming out with its third report this year. From the large MDTR database, a national waiting list for patients needing deceased donor kidney transplant is maintained in the electronic Malaysian Organ Sharing System (eMOSS) database.

Traditionally, NRR will organize a session to meet the SDPs and report the latest registry findings during the Annual Congress in Nephrology hosted by the Malaysian Society of Nephrology. As MSN will be the host of the 12th ISPD Congress in September this year, the annual congress will therefore not be held. It is for this reason that the NRR is organizing this one day seminar to report the latest MDTR findings for the year of 2011. Since a revised national standard in haemodialysis treatment has been completed and adopted by the Ministry of Health, it will be appropriate and timely that the providers of the haemodialysis services become familiar with this new national standards. An official launch of this standard document will be held during the seminar.

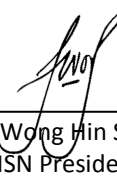

In addition, NRR is also aware of several issues that keep cropping up related to the funding of haemodialysis treatment and the regulatory issues related to HD unit licensing and monitoring by the Ministry of Health. A session to meet the providers (JPA, SOCSO, Lembaga Zakat etc) and regulators (Medical Practice Division) will be held to allow access to information and enable outstanding issues to be sorted out.

We wish to express our indebtedness to all individuals and organisations that had continuously supported the activities organized by the National Renal Registry to ensure a regular publication of the annual MDTR report. It is also our wish that the program lined up for this one day seminar will assist us in providing better and safer dialysis services in this country.

May we take this opportunity to thank the organizing committee, the speakers, The Ministry of Health Malaysia, the secretariat and all those who had contributed to the success of this program.
